PERIMETER SECURITY SOLUTIONS

## WEDGE BARRIERS

a PERFORMANCE DRIVEN company

## Wedge Barriers

Wedge barriers provide unparalleled security against vehicular attacks at sensitive facilities such as military bases, corporate headquarters, water treatment plants, nuclear facilities, and embassies. Available in various crash ratings, wedge barriers are often installed along-side other high security products such as bollards, security gates, guard booths, and drop arms to provide one of the world's most formidable vehicular protection systems. They are available in shallow and deep foundation systems, as well as surface-mount.

Tusco's team of certified installers are qualified and experienced in the installation, operation, and maintenance of crash rated wedge barriers.
