

Overview

Join our manufacturing team as a Maintenance Technician, where your expertise will keep our production smoothly and efficiently! In this vital role, you will be responsible for maintaining, troubleshooting, and repairing a wide range of manufacturing equipment and systems. Your technical skills and proactive approach will ensure minimal downtime, optimize equipment performance, and support continuous improvement initiatives. This is an exciting opportunity for a motivated professional passionate about industrial maintenance and eager to contribute to a thriving manufacturing environment.

Duties

- Perform routine inspections, preventive maintenance, and repairs on manufacturing equipment, including electrical, hydraulic, pneumatic, and mechanical systems.
- Troubleshoot complex issues using schematics, electrical blueprints, and diagnostic tools such as ammeters, ohmmeters, and other precision measuring instruments.
- Diagnose electrical system faults, including high voltage and low voltage circuits, utilizing electrical diagnostics and engineering troubleshooting techniques.
- Utilize CMMS (Computerized Maintenance Management System) to document work orders, track maintenance history, and schedule preventive tasks.
- Conduct equipment troubleshooting involving programmable logic controllers (PLCs), industrial electrician tasks, HVAC/R systems, and welding processes.
- Operate field service tools such as scissor lifts safely to access elevated or hard-to-reach machinery components.
- Read electrical schematics and blueprints accurately to facilitate repairs and modifications in accordance with safety standards.
- Support equipment repair projects involving hydraulics, pneumatics, and mechanical components while adhering to safety protocols.
- Assist with installation of new machinery or upgrades by following technical specifications and engineering drawings.
- Provide exceptional customer service by collaborating with production teams to minimize downtime and improve operational efficiency.
