

APC GRANFLO

PRODUCT DESCRIPTION: APC GRANFLO low dust pigments are free flowing, granular form synthetic iron oxides that can be easily used in automatic dispensing systems. GRANFLO low dust pigments are available in 4 primary colors; Black, Yellow, Light Red and Medium Red. These can be combined on site to create a wide spectrum of colors. Custom color matches are available to meet most color requirements. APC GRANFLO is produced from high quality iron oxide pigments which disperse easily to develop full tint strength. All APC iron oxide pigments comply with ASTM C979 for integral colored concrete.
