QUIK-Stick IWS

Ice & Water Sand

Uses & Description
QUIK-Stick Ice & Water Sand is an SBS modified self-adhering membrane reinforced with non-woven fiberglass mat for extra strength and durability. QUIK-Stick Ice & Water sand is a highly versatile underlayment that provides superior waterproof integrity and is an excellent second wall of defense against wind driven rain and seepage due to ice damming. For use on decks 2:12 and greater.

Benefits
- Offers a skid resistant, sand surface
- Allows for easy installation and handling as a result of silicone treated split back release film
- Provides high temperature stability
- May be installed directly to concrete, plywood, wood composition board and gypsum
- Self seals around nails
- May be used in new construction or re-roofing
- May be left exposed up to 60 days prior to application of finished roof
- Offers greater tear resistance than traditional felt underlayment
- Provides protection for critical areas such as rakes, eves, valleys, flashings, hips, ridges, dormers and skylights
- Provides excellent low temperature flexibility
- Florida Approval (FL #17401)
- Miami-Dade Approval

Specifications
Reference ASTM 1970
Thickness, min 50 mils
Maximum Load, min MD=35 CD=35
Elongation at Break, min 30%
Adhesion to Plywood @ 77 °F min 20.0 lbf/ft
Thermal Stability, max 0.05
Flexibility Temperature, @ -20 °F min pass
Sealability around nail pass
Water Proof Integrity after Low Temp. Flex pass
Waterproof Integrity of lap Seam pass
Slip Resistance pass
Rolls per Pallet (label / box) 25 / 25
Rolls per Pallet (box only) 30
Roll Weight 68 lbs ± 2lbs
Roll Diameter 7.5 in.
Square feet 100/195
Available roll dimensions
36” x 33.4’ (100sqft)
36” x 65’ (195sqft)
